Housing length: $1\frac{7}{8}$ "

Housing diameter: $\frac{3}{8}$ "

Overall length: $3\frac{3}{8}$ "

SB 65 Spring Bolt

Spring bolts are used to secure single hung unbalanced lower sash. The bolts slip into $\frac{3}{8}$ " diameter holes drilled through the lower stiles and engage holes drilled into the window jamb. In addition these brass spring bolts can also be used in a variety of situations where a sash or screen needs to be easily removable, such as with out-swing casement windows. The attractive spade shaped finial affords a secure and comfortable grip. Available in five finishes.
