

Nylon Tipped Spring Bolt

Materials: Nylon Tip, Stainless Steel Spring

Dimensions:

Housing length: $1\frac{7}{8}$ "

Housing diameter: $\frac{3}{8}$ "

Overall length: $3\frac{3}{8}$ "

NB 65 ZN Nylon Tipped Spring Bolt

The SRS NB 65 ZN Nylon Tipped Spring Bolts are a higher quality version of the now discontinued Stanley #1697 spring bolt. We have incorporated Stanley's economical nylon tip and replaced the steel housing with non-corroding zinc plated brass and we've used a strong stainless steel spring for a trouble-free service life. The bolt has an attractive spade-shaped finial for a secure and comfortable grip. This cost-effective bolt is used extensively to fasten transom windows by large fire-rated door manufacturers.
