

HOOK AND EYE LINKABLE SASH WEIGHTS

SRS HEW Hook and Eye Linkable Sash Weights

These weights are cleverly made with a hook and eye that can only be disengaged when the weights are held at right angles to each other. Once in the weight pocket, the weights can't separate due to a sudden jerk or by bottoming out. Unlike solid sash weights, the stack is "articulated" and a long chain can be snaked through a small weight pocket cover.

Only available in two sizes - 2 lb. and 3 lb. – *because that's all you need.* Linking these weights together in various combinations will result in any weight, in 1 lb increments, from 2 lbs. up.

SRS HEW weights are only available by the case.

Spec as: HEW 2 or HEW 3
